

Jest and Puppeteer testing

Decision:

Jest and Puppeteer testing frameworks implemented on the OH MY WORDLE! game functionality and framework.

Status:

Approved

Context:

Jest is useful to validate anything in JavaScript, mainly web applications. Puppeteer is used for performance testing. Both testing frameworks help test the overall functionality and efficiency of the OH MY WORDLE! application.

Consequence:

Testing will confirm that the code runs efficiently to ensure the OH MY WORDLE! application runs efficiently and as expected.
